Procurement Policy

Owner: Finance · Version 2.1

1. Purchase thresholds

Purchases under 1,000 EUR need approval from the budget owner. Purchases from 1,000 EUR to 10,000 EUR need two written quotes and approval from the department head. Purchases above 10,000 EUR need three written quotes and approval from both the Finance Director and the CFO.

2. Purchase orders

A purchase order must be raised before an order is placed with a supplier. Invoices without a matching purchase order are returned to the supplier.

3. Payment terms

Standard payment terms for suppliers are 30 days from the invoice date. Shorter terms require Finance Director approval.

4. Software and SaaS

Every software or SaaS purchase must be reviewed by IT Security before purchase. Tools that will process customer data also require a data processing agreement.

5. Vendor onboarding

New suppliers are onboarded by the procurement team, which checks company registration, bank details and sanctions lists before the first payment.
